

CONSTRUCTION OF CHIPUDZI PRIMARY SCHOOL BLOCK NEAR GOLOMOTI

At Chipudzi Primary School, insufficient classrooms meant many children used to be taught under trees and in thatched structures, resulting in classes being cancelled when the weather was poor and many children not attending due to the disruption and discomfort. JCM provided \$45,245 in funding for the development of a double classroom block, including an office for the staff. The construction was done by Kungoni Contractors, and the school was opened in April 2021. Additionally, JCM also funded the supply of 120 desks for the classroom. The construction of the two classrooms caters for a total of 139 students, while there are still 19 students that are receiving schooling outside the classrooms.

"We are grateful to JCM for supporting the government's efforts in providing quality education to its citizens. What you have done here by transforming this primary school is very commendable. We would like other companies to emulate what JCM has done by providing a conducive learning environment as it encourages more children to enroll and remain in school instead of the fields, where they could be exposed to child labor practices."

Mr. Shaban, Headteacher, Chipudzi
